

# COVID-19 Misinformation

## About this report

As the global community faces the COVID-19 pandemic together, Twitter is helping people find reliable information, connect with others, and follow what's happening in real time.

Effective November 23, 2022, Twitter is no longer enforcing the COVID-19 misleading information policy.

#### Accounts challenged

### 02. Overview

The world has changed dramatically since this pandemic was first declared a public health emergency. Since then, public health experts, medical professionals, scientists and researchers have been educating and informing us on how to stay safe, and Twitter has worked to highlight and empower that vital public conversation. As the global vaccination rollout evolves and the pandemic enters a new phase, we are committed to ensuring our rules and enforcement match the changing nature of the content we're seeing on Twitter.

Similarly, as the distribution of COVID-19 vaccines expands around the world at varying degrees of pace and scale, people continue to turn to Twitter to discuss what's happening and find the latest authoritative public health information. As such, we continue to prioritize removing or annotating potentially harmful and misleading information to ensure that users can readily find credible information during this critical phase.

Further details about some of the most common types of misleading claims which we will remove under this policy are provided [on our blog](#).

**September 2022**

**520 accounts challenged**

**173 accounts suspended**

**602 content removed**

In the month of August, we challenged 520 accounts, suspended 173 accounts, and removed 602 pieces of content globally.

**Total Since January 2020**

**11.72M accounts challenged**

**11,230 accounts suspended**

**97,674 content removed**

Since introducing our COVID-19 guidance last year, we have challenged 11.72 million accounts, suspended 11,230 accounts, and removed over 97,674 content worldwide as of September 2022.
